

DR. VEERENDRA SANDUR

Consultant - Gastrointestinal Science

Qualification

MBBS | MD | DNB - Pediatrics | DM Gastroenterology | Fellowship in Hepatology and Liver transplant (Toronto)

Overview

Dr. Veerendra Sandur is a highly accomplished medical gastroenterologist and hepatologist with over 20+ years of clinical experience. He is currently practicing at Manipal Hospital Kanakapura Road as Consultant - Medical Gastroenterology & Hepatology. Renowned for his expertise in advanced therapeutic endoscopy, hepatology, and liver transplantation, Dr. Veerendra has consistently delivered exemplary patient outcomes and pioneered complex procedures in both paediatric and adult patients. Dr. Sandur completed his medical education with an MBBS, MD, and DM in Gastroenterology & Hepatology. He also went on to obtain a Fellowship in Hepatology & Multi-Organ Transplantation from the University of Toronto, Canada. He holds a stellar academic record as a gold medallist and university rank holder throughout his academic career. Dr. Sandur's areas of specialisation include therapeutic endoscopy (ERCP, EUS, and Spyglass cholangioscopy), liver transplantation (pre- and post-transplant care), and advanced paediatric endoscopic procedures. Over the years, Dr. Sandur has successfully led multidisciplinary teams, mentored junior doctors, and initiated quality improvement measures that have substantively improved patient care standards. He is also an accomplished clinical researcher, with multiple peer-reviewed publications and presentations at national and international medical conferences. Dr. Sandur is a life member of several prestigious professional societies, such as the Indian Society of Gastroenterology and the Indian Association of Paediatrics, and remains at the forefront of innovations in gastroenterology and hepatology. As a top gastroenterologist in Kanakapura Road, Bangalore, Dr. Veerendra Sandur is known for his innovative procedural skills, clinical expertise, research acumen, and unwavering commitment to medical excellence. Dr. Sandur has authored numerous scientific papers and case reports in leading journals, with notable studies on liver disease, gastro-esophageal reflux, paediatric GI disorders, and intervention outcomes. He has also presented at major national and international conferences, receiving awards for academic excellence and best presentations.
