

DR. MOU CHATTERJEE

Consultant - Obstetrics And Gynaecology

Qualification

MBBS | DGO | FRCOG

Overview

Dr. Mou Chatterjee, an eminent obstetrician and gynaecology specialist at Manipal Hospitals, Mukundapur, Kolkata, has established a distinguished career spanning more than 30 years, including 27 years as a specialist in the domain. After graduating Bachelor of Medicine and Bachelor of Surgery (MBBS) from Bardhaman Medical College, West Bengal, she later pursued a Diploma in Gynaecology and Obstetrics (DGO) at Chittaranjan Seva Sadan and Sishu Sadan Hospital, West Bengal. Her persistence and relentless pursuit later earned her a fellowship from the Royal College of Obstetricians and Gynaecologists (FRCOG). She is the best Obstetrician and Gynecologist in Mukundapur, Kolkata. Dr. Chatterjee specialises in the areas of Hysterorrhaphy and Hysteroplasty Surgery, Uterus Tumour Removal Procedures, Vaginal Hysterectomy, Laparoscopic Myomectomy Procedures, and facilitating the delivery of normal and high-risk patients, including Vaginal Birth After Caesarean (VBAC). Her extensive skill set enables her to stay current with the latest developments and advancements in the field. This motivates her to offer effective treatments and provides opportunities to enhance her knowledge and skills further. Dr. Chatterjee is fluent in English, Hindi, and Bengali. Her linguistic skills enable her to communicate easily with patients, understand their medical conditions, and address any concerns related to therapeutic interventions and surgeries.

Fellowship & Membership

- Fellow of the Royal College of Obstetricians and Gynaecologists (FRCOG)

Field of Expertise

- Specialising in performing Hysterorrhaphy and Hysteroplasty Surgery for patients with abnormal uterus, improving the integrity of the uterus, and overcoming disorders related to the uterus.
- Experienced in executing Uterus Tumour Removal Procedures, covering both benign and malignant, ensuring optimal patient outcomes.
- Proficient in Vaginal Hysterectomy for the treatment of various uterine problems, with a focus on achieving minimal complications and quick recovery.
