

DR. ATUL VAJPEYI

Consultant - Neurosurgery

Qualification

MS (Orth) | MCh (Neuro Surgery)

Overview

Dr. Atul Vajpeyi is a distinguished neurosurgeon with over 25 years of clinical experience, currently practising at Manipal Hospitals, Salt Lake, Kolkata. Renowned for his expertise in neurosurgery, Dr. Vajpeyi has held key positions at several leading healthcare institutions in India. Throughout his career, he has managed a wide array of complex neurosurgical cases, earning a reputation for precise diagnosis and compassionate, patient-centred care. Dr. Vajpeyi holds an MBBS degree, followed by an MS in Orthopaedics and an MCh in Neurosurgery, signifying his strong academic and clinical foundation. His core competencies include both cranial and spinal neurosurgery, and he specialises in procedures such as craniotomy, VP shunt placement, microdiscectomy, cerebral angioplasty, deep brain stimulation, and stereotactic radiosurgery. His advanced surgical skills also extend to treating conditions like aneurysms, brain tumours, skull base deformities, hydrocephalus, trigeminal neuralgia, and various forms of trauma and stroke. Additionally, he is adept at minimally invasive and endoscopic neurosurgical procedures, making treatment more precise and less invasive for his patients. Over the years, Dr. Vajpeyi has actively contributed to medical research, publishing several papers and participating in neurosurgical workshops and conferences. He remains involved in various innovations in functional and cerebrovascular neurosurgery. Known for his calm demeanour and thoughtful approach, he is trusted by patients and peers alike. Dr. Vajpeyi is proficient in English, Bengali, and Hindi, allowing him to communicate effectively across diverse patient groups. With his rich experience, technical proficiency, and dedication to advancing the field of neurosurgery, Dr. Atul Vajpeyi continues to play a pivotal role in improving neurosurgical outcomes in Eastern India. He is the best Neurosurgeon in Salt Lake, Kolkata. He is also committed to mentoring young neurosurgeons, regularly conducting training sessions and clinical demonstrations to foster surgical excellence. Dr. Vajpeyi believes in a multidisciplinary approach, often collaborating with neurologists, radiologists, and rehabilitation experts to ensure comprehensive patient care. His strong ethical values and patient-first philosophy have earned him deep respect within the medical fraternity. In addition to his hospital work, he actively participates in community outreach programs aimed at spreading awareness about neurological disorders and early intervention. With a vision to integrate cutting-edge technology with empathetic care, Dr. Vajpeyi continues to set new benchmarks in the neurosurgical Indian landscape.
