

DR. SUNIL SUBHASH JOSHI

Senior Consultant - Vascular Surgery

Qualification

M.S. (General surgery) | FAIS (Fellow Association of Indian Surgeons) | FVES (Vascular & Endovascular surgery)

Overview

Dr Sunil Joshi is vascular and endovascular surgeon, with a distinguished academic career, which laid a strong foundation, giving him a broad insight into the subject as he acquired all the necessary surgical skills to deal with the vast and challenging problems encompassing the field. Has expertise in treating patients with peripheral vascular diseases, which involves clinical evaluation, interpretation of diagnostic studies, decision making and formulating a management plan. He offers a variety of treatments for vascular diseases ranging from medical management, endovascular therapy and vascular surgery. Commonly performed procedures include aortobifemoral, femoropoplietal and distal bypasses, amputations, peripheral aneurysm repairs, carotid surgery, AV malformation excisions, Varicose vein surgery, AV fistula creation, graft placement. Endovascular procedures performed include, Diagnostic peripheral angiography, Balloon angioplasty, Stenting, Endovenous Laser/RF ablation of varicose veins, IVC filter placements. I have extensive experience in management of vascular emergencies like, acute limb ischemia and vascular trauma. Miscellaneous diseases treated include DVT, Diabetic foot problems and venous ulcers. Areas of He is a Vascular & Endovascular Surgeon In Sarjapur Road, Bangalore who values ethics and practices evidence based medicine and follows international and national protocols in patient management.

Field of Expertise

- Aortobifemoral
- Femoropoplietal and distal bypasses
- Amputations
- Peripheral aneurysm repairs
- Carotid surgery
- AV malformation excisions
- Varicose vein surgery
- AV fistula creation
- Graft placement
- Endovascular procedures performed include, Diagnostic peripheral angiography, Balloon angioplasty, Stenting, Endovenous Laser/RF ablation of varicose veins, IVC filter placements
- I have extensive experience in management of vascular emergencies like, acute limb ischemia and vascular trauma. Miscellaneous diseases treated include DVT, Diabetic foot problems and venous ulcers
