

DR. NEETU SHUKLA

Associate Consultant - Paediatrics

Qualification

MBBS | DCH

Overview

Dr. Neetu Shukla Singh is an experienced paediatrician in Bangalore. She is currently practising as an Associate Consultant - Paediatrics at Manipal Hospital Sarjapur Road, Bangalore. With over 11+ years of clinical expertise, she has extensive experience in managing paediatric patients, from neonates to adolescents, covering both outpatient and inpatient care. Dr. Neetu has worked closely with leading consultants throughout her career, refining her expertise in diagnosing and treating complex paediatric conditions. Her commitment to child health is evident through her meticulous approach to patient care, ensuring comprehensive medical attention for children across diverse socioeconomic backgrounds. She is the best Paediatrician in Sarjapur Road, Bangalore. Dr. Neetu's medical journey is marked by her specialisation in paediatric emergencies, neonatal intensive care (NICU), and paediatric intensive care (PICU). After earning her M.B.B.S. from Lady Hardinge Medical School (1999 - 2004), she pursued her post-graduation Diploma in Child Health from Maulana Azad Medical College, (2010-2012), where she gained hands-on experience in managing OPDs, NICU, PICU, and general paediatric wards. She is proficient in neonatal resuscitation, peritoneal dialysis, umbilical vein catheterisation, and bone marrow aspiration. With a keen interest in critical care paediatrics, Dr. Neetu has actively participated in various national and international conferences, continuously updating her knowledge on paediatric advancements, including the management of bronchial asthma, dehydration in children, paediatric diabetes, and infectious diseases. She has contributed to paediatric education and training, supervising junior residents and participating in multiple workshops on childhood disabilities, paediatric advanced life support, and neonatal care. Her commitment to evidence-based treatment and compassionate approach to patient care have earned her the trust of numerous families. Dr. Neetu's clinical expertise spans paediatric growth monitoring, vaccination programs, and the management of chronic paediatric diseases. She is proficient in invasive BP monitoring, exchange transfusion, lumbar puncture, and paediatric emergency procedures. She has actively contributed to paediatric research and has been a part of multiple case studies on neonatal sepsis, neurodegenerative disorders, and chronic kidney diseases in children. Fluent in English and Hindi, Dr. Neetu ensures clear communication with parents and caregivers, offering guidance on paediatric health, nutrition, and preventive care. She is dedicated to providing personalised, compassionate medical care, making a meaningful impact on the well-being of her young patients.

Field of Expertise

- Pediatric Intensive Care: Skilled in managing Pediatric Intensive Care Units (PICU) and Neonatal Intensive Care Units (NICU), including emergencies and critical care for premature neonates to adolescents
- Advanced Pediatric Procedures: Proficient in exchange transfusion, umbilical vein catheterisation, invasive BP monitoring, intercostal drainage, lumbar puncture, and bone marrow aspiration
