

## DR. VIDYADHAR P METRI

Consultant - Anaesthesiology

### Qualification

MBBS | MD | FLTA

### Overview

Dr. Vidyadhar P. Metri is an experienced anaesthesiologist, currently working as a Consultant - Anaesthesiology at Manipal Hospital Whitefield, Bangalore. With more than 8 years of specialised expertise, Dr. Vidyadhar P Metri has gathered extensive clinical expertise spanning several key areas, including cardiothoracic anaesthesia, liver transplant anaesthesia, neuro anaesthesia, paediatric anaesthesia, and obstetric anaesthesia, along with expertise in critical care management. He routinely manages complex anaesthesia requirements for liver transplants, gastrointestinal, and hepatobiliary surgeries, including both adult and paediatric patients. He is the Best Anesthesiologist in Whitefield, Bangalore. Dr. Vidyadhar P. Metri's academic background includes an MBBS from Al-Ameen Medical College, Vijayapura, and an MD in Anaesthesiology. He has also completed a Fellowship in Liver Transplant Anesthesia and Critical Care, adding to his academic portfolio. He is adept in managing invasive procedures such as arterial and central venous lines, and advanced airway management techniques. Dr. Vidyadhar has assisted with anaesthesia administration in 280+ transplants. His extensive experience with various types of anaesthesia has made him a reliable consultant for high-risk and emergency cases. As an Anaesthesiologist, Dr. Metri's unwavering commitment to patient safety and precise perioperative care is a cornerstone of his practice. He ensures that every patient receives individualized attention, drawing on his understanding of liver physiology and transplant-specific challenges to deliver the highest quality of care. His dedication to research in the field of anaesthesia, as evidenced by his numerous publications in reputed journals, further underscores his commitment to patient safety. Dr. Vidyadhar Metri's proficiency in Kannada, Hindi, and English is more than just a skill; it's a commitment to effective communication and patient care. His ability to communicate fluently in these languages ensures that he can connect with a diverse range of patients and their families, making them feel included and understood.
